

**IN THE SPECIFICATION:**

**Please delete the paragraph beginning on page 5, line 14 and replace with the following:**

In the depicted example, a server 104 is connected to network 102 along with storage unit 106. In addition, clients 108, 110, and 112 also are connected to network 102. These clients 108, 110, and 112 may be, for example, personal computers or network computers. In the depicted example, server 104 provides data, such as boot files, operating system images, and applications to clients ~~108-112~~ 108, 110, and 112. Clients 108, 110, and 112 are clients to server 104. Network data processing system 100 may include additional servers, clients, printers 114, 116 and 118, and other devices not shown.

**Please delete the paragraph beginning on page 6, line 21 and replace with the following:**

Peripheral component interconnect (PCI) bus bridge 214 connected to I/O bus 212 provides an interface to PCI local bus 216. A number of modems may be connected to PCI bus 216. Typical PCI bus implementations will support four PCI expansion slots or add-in connectors. Communications links to network computers ~~108-112~~ 108, 110, and 112 in Figure 1 may be provided through modem 218 and network adapter 220 connected to PCI local bus 216 through add-in boards.
